## Downloading Authenticator App to Your Android Device

Due to the sensitive information included in **TRAC-IT**, you must use an authenticator app to verify your identity when logging into the system.

This document will explain the steps you may use when downloading the authenticator app to your Android device. The exact steps may differ based on your particular phone settings and these are intended to be used as a general guideline. For help, you can use the following links:

Microsoft – https://www.microsoft.com/en-us/security/mobile-authenticator-app

Google -

https://play.google.com/store/apps/details?id=com.google.android.apps.authenticator2&hl=en \_US&gl=US

Authy – https://authy.com/download/

Note: The Support Desk is able to help you log into TRAC-IT using the authenticator app. The Support Desk is not able to help with downloading the authenticator app onto your personal device.

## Downloading the Microsoft Authenticator App

**1.** Search Google Play for the Microsoft Authenticator App:

2. Click Install to download the app to your phone:

3. Find the App on your phone. Open the app and this screen appears - Click Agree

**4.** You may be prompted to log into an account or scan a QR code. You do not need an account – select *Skip* and this screen will appear:
